ABOUT US

TOPAAZ INDUSTRIES

A Leading Manufacturer And Distributor Of Roll-Formed Building Products Using High-Quality Zinc-Aluminium Coated Steel, We Are Committed To Delivering Strength, Durability, And Long-Lasting Performance For Modern Construction Needs.

Our Comprehensive Range Of Products Includes Roofing And Cladding Profile Sheets, Standing Seam Profiles, Purlins, Decking Sheets, Polycarbonate Sheets And Puf Panels. Each Product Is Engineered With Precision To Provide Excellent Structural Support, Weather Resistance, And Aesthetic Appeal, Making Them Ideal For A Wide Range Of Applications Across Diverse Environments

VISION

To Become The Industry Leader In Roofing By Integrating Top-Tier Processes, Practices, Talent, and Partnerships.

MISSION

To Consistently Provide Cutting-Edge and Forward-thinking Roofing and Purlin Construction Solutions Through Innovation, Excellence, And Empowerment.

MANUFACTURING FACILITIES

ADVANCED ROLL-FORMING TECHNOLOGY

High – speed machinery ensures precise and uniform profiles.

PREMIUM QUALITY MATERIALS

Zinc – Aluminium coated steel for long-lasting durability.

STRICT QUALITY CONTROL

Every product undergoes rigorous inspection before dispatch.

ADVANCED INFRASTRUCTURE. PRECISION MANUFACTURING. TRUSTED QUALITY.

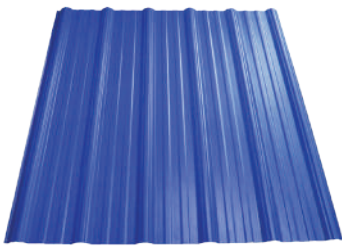

At Topaaz Industries, Our Manufacturing Facilities are Built To Deliver High – Performance Steel Building Solutions With Unmatched Consistency And Precision.

OUR PRODUCT

Topaaz Offers A Comprehensive Range Of High - Quality Building Products Designed To Meet Diverse Construction Needs, Including Roofing Sheets, Decking Sheets, Purlins, Standing Seam Systems, Polycarbonate Sheets, and Puf Panels.

Engineered With Precision and Manufactured Using Premium Materials, Our Products Ensure Superior Strength, Durability, And Performance.

STRUCTURAL LAP

SIMPLE END

TOP Purlin and Girts are designed to form a reliable and efficient secondary structural framework, supporting roofing and wall cladding systems with precision and strength. Manufactured from high-grade steel using advanced roll-forming technology, they ensure dimensional accuracy, uniform quality, and enhanced durability.

PURLIN

TOP Purlins and TOP Girts are precision-engineered structural solutions designed to deliver superior strength, efficiency, and cost-effectiveness across diverse building applications.

Manufactured to exacting standards, they offer a comprehensive range of section depths in both 'C' and 'Z' profiles, ensuring design flexibility and structural reliability. With excellent load-bearing capacity and long-term performance, they are ideally suited for modern industrial and commercial construction projects.

Z - PURLIN

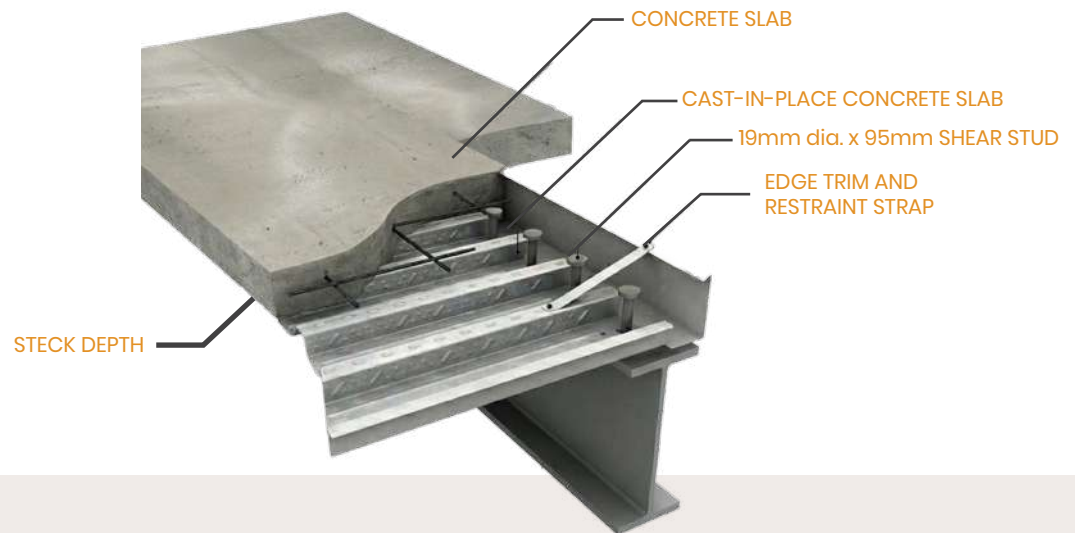

C - PURLIN

DECKING SHEET

TOP Deck Decking Sheets are engineered to deliver superior strength, stability, and structural performance for modern construction applications. Designed with precision profiling, they ensure optimal load distribution and enhanced load-bearing capacity. Manufactured using high-quality steel, these sheets provide durability and consistency in performance.

STANDING SEAM

TOPZIP - 470

Standing seam roofing is a premium, long-span metal roofing solution known for its superior durability and weather resistance.

Its concealed fastening system ensures a clean, modern appearance while providing 100% leak-proof performance.

TOPSEAM - 430

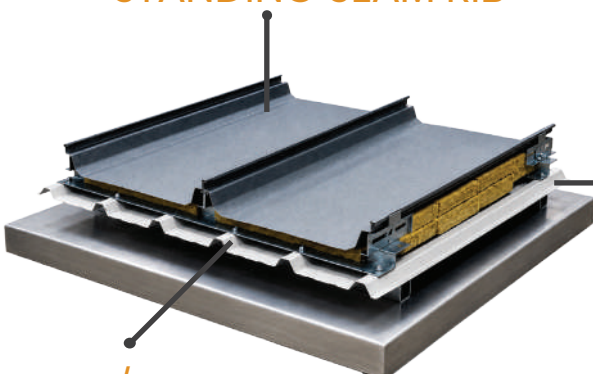

Designed for long-term use with minimal maintenance, standing seam systems offer excellent structural performance and a **lifespan of 40-70 years**. They are ideal for industrial, commercial, high-end architectural applications, delivering reliable protection against wind, rain, and harsh environmental conditions.

POLYCARBONATE SHEET

Polycarbonate Sheet is a high-performance thermoplastic sheet known for high impact strength, light transmission, weather resistance, and thermal insulation. Used widely in roofing, skylights, facades, industrial sheds, and architectural glazing.

PUF PANEL

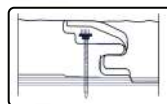

Topaaz PUF panels are engineered to deliver superior thermal insulation, effectively controlling heat transfer and protecting interiors from extreme temperatures. They provide excellent structural strength and long-term durability, making them ideal for modern building applications.

Designed for industrial, commercial, and cold storage environments, these panels ensure energy efficiency, faster installation, and reduced construction time. With precision manufacturing and consistent quality, they offer reliable and cost-effective solutions for roofing and wall cladding systems.

Roofing Solutions Delivered **Across Sectors**

A curated selection of industrial & commercial roofing projects executed with a focus on structural performance, material reliability.

Experience, Craftsmanship & Client Trust

We combine manufacturing expertise with practical on-site understanding to deliver roofing solutions that meet real-world project demands.

Proven Industry Experience

Backed by years of hands-on expertise delivering roofing solutions for industrial and commercial projects.

Technical Reliability

Engineered to meet structural standards and perform reliably in real-world conditions.

Consistent Product Quality

Manufactured with strict quality checks to ensure strength, durability, and uniform performance.

Transparent Communication

Clear timelines, accurate information, and no surprises at any stage of the process.

Our Clients

Explore completed roofing projects across industrial sheds, warehouses, and commercial buildings – executed with precision and durability.
